

Integrated Surveillance and Defense, Inc

Cessna 208 Integrated Surveillance Systems

ISD provides custom airborne surveillance solutions for the Cessna 208, by providing mission equipment specific to your aircraft.

We design the installation to meet FAA certification requirements and we offer DER approvals of our designs. All equipment is integrated at our facility prior to shipment.

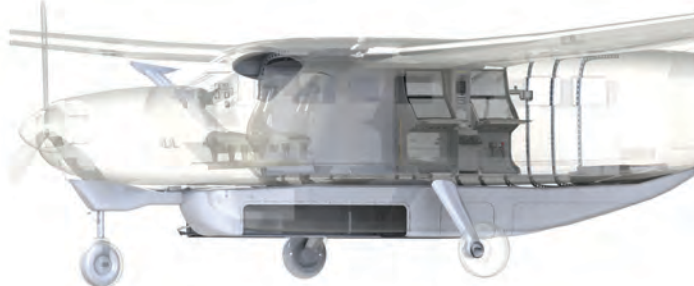

Our FAA certified technicians perform the installation at your location to get your Air Unit up and running quickly.

Search & Rescue · Border Patrol · Reconnaissance · Surveillance · Force Protection
